Dear Exhibitor,

You are cordially invited to participate in this year's "Tech Expo & More" to be held on October 23rd 2010 in the Grace Pavilion at the Sonoma County Fairgrounds, located at 1350 Bennett Valley Rd, Santa Rosa.

Tech Expo & More is a unique two-fold event that highlights assistive technologies and utilization of these technologies; Secondly, it gives you the chance to educate and inform the public about the type of services you provide by building relationships with others so you can provide referrals for the consumers and clients you see. The hope is that there will be something there for every individual interested in their independence, health, wellness and quality of life. The Exhibition will provide individuals with information on assisted technology, veterans, homeless, housing, physical, consumer support, family support, employment, independent living, education, health care and mental health services as well as food and education resources so that individuals are able to access services and support for their overall health and wellness in our community with or without a disability.

The resources at this event range from City and County Services, to a variety of businesses, health organizations and supportive agencies. By attending this Event, you will have opportunity to demonstrate your Products & Services to various groups of Seniors, Veterans, People with Disabilities, Health Professionals, Educators and the Public. Please join us for the Tech Expo & More because collaboration is the key to providing affective support and services to those with whom we serve.

I can be reached at 707-528-2745 ext 306 Monday through Friday 8:00am - 4:00pm. I am looking forward to speaking with you or your representative about participating in this event. There will be a \$100 sponsorship package opportunity, plus a \$100 registration fee for each 8' by 10' booth space. Pre-registration is required, limited number of spaces will be on first-come basis.

Thank you very much,

Vaughn Held
AT Program Manager
